

Carnival Isles

Thank you for purchasing actionXL's new motion-controlled Carnival Isles game. We are excited that you have chosen to become a part of the motion in gaming revolution, and that you have chosen the actionXL controller.

In order to play you will need an actionXL motion controller (wired or wireless), and a computer running either Windows Vista or Windows XP, with at least 1 open USB port.

Installing Carnival Isles

Installing from the actionXL website

Download the free trial version from the actionXL website. You can choose to Save or Run the game. If you choose Run, simply select the default options during installation. Once the installation finishes, a game icon should appear on your desktop.

If you choose to Save the game, once the game finishes downloading, go to the folder you downloaded the game to. Double click the exe file that you downloaded. Select the default options during installation. Once the installation finishes, a game icon should appear on your desktop.

Installing from a CD

The CD should start running after you insert it into your CD/DVD drive. If it doesn't run automatically, the CD may be damaged. Call actionXL customer support and we will help you start program manually. If the CD is damaged, we will replace it and make every effort to help you get the game installed.

Activating to the Full Version (requires Internet connection)

The full version allows you to play against your friends, play in Grand Prix mode, and opens Round Robin mode so you can play both sides.

If you do not have an activation key yet, use the left button to click on the Unlock icon in the Main Menu, and then click on the Buy Now icon. Once you have completed your purchase through the Kagi Store secure server, an activation code will be emailed to you.

To activate your copy of Carnival Isles and unlock all of the features, use the left button to click on the Unlock icon in the Main Menu, and then click on the Activate Now icon. When activating, you will be asked to create a password. Use a password that is easy to remember. You will need this password if you ever need to reinstall Carnival Isles on your computer.

The Main Menu

Use your controller to control the main menu. Tilting left or right will turn the menu wheel left and right. When the selection you want is at the top of the wheel, click the left button to choose it.

Start Game

When the star is at the top of the menu wheel, the words Start Game appear. Click the left button on your Motion Controller to select.

Options

When the star is at the top of the menu wheel, the words Start Game appear. Click the left button on your Motion Controller to select.

Click to view the latest high scores.

Credits

The crew responsible.

Unlock

Use this to purchase the full version of Carnival Isles, or enter an activation code.

Exit

Meet the Rascals

Use your Motion Controller to turn the menu wheel and select your character.

Bounce (and Little Bounce)
They love to jump but Little Bounce never goes anywhere without his mama.

Jade
Jade is brave and strong but not very fast.

Jay
He thinks he's a rock star because he can sing but he's really a flyer.

Boo
Boo is very smart and reads a lot but doesn't like too much action.

Roxy
She is a sly little fox who is very quick and a little sneaky.

Belle
Belle loves to dance and has a great memory.

Dash
Nobody is faster than Dash.

Hedge
Hedge doesn't take chances. Digging holes is the safest way for him to travel.

Jack
Pirate Jack with 8 arms and a heart of gold. He can really hang on.

Adam
Adam Ant is the strongest Rascal but he's not very smart.

Crock
Crock likes to have a bit of fun but he's hungry all the time. He's a great swimmer.

Leo
Leo thinks he is the King of the Rascals but he gets distracted by his own reflection.

At any time, the Back button will move you back to the previous menu.

Playing Modes

Training

Training mode means you only play as the main character against the computer characters. For example in Hang Gliding you only get to be the pilot while the other Rascals use their air cannons to try to blow you off course.

Round Robin

In Round Robin mode, you get to play both sides. For example in Hang Gliding, you start as the pilot but once you land you get to use your air cannon to shoot puffs of wind and try to blow the next pilot off course.

Game Modes

Single Game

Choose just the game you want to play. Your high score will be saved for that game

Grand Prix

In Grand Prix mode you play through all 5 worlds. Your high score is based on your overall score.

The Games

Balloon Darts

- Make a throwing motion while holding the left button. Release the button at the end of the throw, aiming for balloons to get points.
- You can throw to the left and right by aiming to the sides. It takes a little practice, so experiment with how much side movement you use.
- When you play in Round Robin mode and your turn as dart thrower is over, you become one of the balloon pumpers. Hold the controller horizontally, and inflate your balloon with a pumping motion. Bigger balloons are worth fewer points.

Dodge Bowling

- Press the button with the controller in front of you, then smoothly swing back and then forward to bowl, releasing the button when you would release the ball
- You can guide the ball a little by tilting the controller to the left or right.
- There are 2 power ups. One will speed your ball up, and the other will slow your ball down.
- When you play in Round Robin mode, and your turn as a bowler is over, you become one of the pins. Tilt your controller back and forth to dodge the ball.

Hang Gliding

- Tilt left to turn left, and right to turn right. Tipping your controller forward will make you fly a little faster, and tipping it up will slow you down.
- Try to fly through as many rings as you can.
- The other Rascals are trying to blow you off course with their air cannons, so try to avoid the puffs of air.
- Land on the bulls eye for extra points.
- When you play in Round Robin mode, and your turn as a pilot is over, you become one of the air cannon shooters. Tilt your controller to rotate the cannon, and press the left button to shoot.

Tree Jumping

- Try to collect as many honey filled hives as you can.
- Tilt the controller left and right to jump to the left or right. Then jerk the controller up to jump from branch to branch. Don't wait too long to jump or the branch will break.
- The other rascals are throwing acorns to tell the bees you are coming. Don't land on a red hive!
- When you play in Round Robin mode, and your turn as a jumper is over, you become one of the acorn throwers. Hold the left button, while making a throwing motion with the controller. Aim for beehives to alert the bees.

Log Rolling

- Keep your controller pointed straight up to balance your character on the log. Tilt forward and back to keep your balance. Tilt left and right to dodge the fish that the other Rascals are launching in the river.
- When you play in Round Robin mode, and your turn as a log roller is over, you become one of the fish launchers. Tilt your controller left and right to move back and forth along the bridge, and press the left button to release your fish.

End of Game

At the end of each game, clicking the right button will let you play the same game again. Clicking the left button will return you to the game menu.
